## TEACHING:

Serving as the director of the Maternal and Child Health Bureau-funded Leadership Education in Adolescent Health Training Program and the ACGME-approved Adolescent Medicine Fellowship Program, I develop, coordinate, and oversee didactic, clinical, and research training opportunities for adolescent medicine fellows, psychology post-doctoral fellows, and graduate students in nutrition, nursing, and social work. I routinely provide lectures to medical fellows/residents/students on topics such as adolescent preventive services, adolescent development, sexually transmitted infections, teen pregnancy, school health, cultural competence and working with detained youth. Along with colleagues from Pediatric and Adolescent Gynecology, I developed a simulation training experience for pediatric residents on contraceptive counseling. I also regularly provide continuing education presentations to interdisciplinary audiences.

#### RECENT INVITED LECTURES (Selected):

## **SERVICE:**

A medical career is one of service and advocacy. I believe my commitment to improving the health and wellbeing of our community is evident not only by my service in the training of medical and public health professionals and my roles as clinician and administrator, but also by direct involvement with the community—locally, regionally and nationally.
